### CYCLE FOR DRY MUSCLE MASS: TRENBALON 75+ SP PROPIONATE + OXANDROLONE

Attention, cycle is created only for athletes who have experience in applying anabolic steroids. Cycles for beginners you can find in section for beginners. The cycle duration is 6 weeks. This cycle will suite to athletes, who have normal body weight and subcutaneous fat and who want to gain 3-5 kilos of dry muscle mass, to reduce the amount of subcutaneous fat. The cycle is designed for the improvement of speed and power abilities Is Ideal for martial arts athletes and crossfit. It helps to increase muscle mass without delay of fluid under the skin, which helps to control the weight on the cycle to approach the competition.

Similar cycles use professional sportsmen like runners, swimmers, fighters. The cycle is designed for athletes who prepare to bodybuilding competitions too. The main advantage is the possibility for dry muscle mass growth, burning subcutaneous fat during low carbohydrate diet and body shaping.

SP PROPIONATE will provide smooth androgenic background. It's needed for normal functioning of organism.

TRENBOLONE 75 -is the most powerful anabolic-androgenic steroid, more powerful than SP PROPOINATE in 4-5 times. Is a universal anabolic steroid. With help of it the athlete can achieve quality muscle growth; get a crazy relief, all depends from proper diet. This steroid has earned great popularity among athletes due to the following positive effects on the body:

- Increase in muscle mass

- increased endurance and strength
- increased sexual activity, libido and potency (but testosterone levels decrease significantly after the cycle)
- accelerated burning of subcutaneous fat
- stimulation of the production of Human growth hormone
- reducing the level of cortisol, which is responsible for catabolic processes in muscles.

OXANDROLON is used to get relief and vascularity, also for hormone alignment, is helping to raise the level of self testosterone. Also it should be noted the drug is not aromatized, wouldn't cause fluid retention and will contribute to a good appetite. . OXANDROLON is a soft steroid with minimal side effects, it does not increase blood pressure and has low hepatotoxicity; is the best tablet steroid to get dry muscle recruitment, it does not promote cholesterol, doesn't damage ligaments and joints.

#### **After cycle therapy:**

CLOMID – is anti-estrogen, which is needed for after cycle therapy to increase production of self-testosterone. After cycle therapy is obligated. Its ignorance can lead to health problems. Starting of therapy should be after 2 weeks after finishing the cycle.

#### **How to use?**

**SP PROPIONATE** – 100 mg every other day

**TRENBOLONE 75** – 75 mg every other day
