### SAFE COMBINATION THERAPY CYCLE

Attention, Cycle is created only for athletes who have experience in applying anabolic steroids. Cycles for beginners you can find in section for beginners. Safe combination therapy Cycle will suite to athletes, who have normal body weight and subcutaneous fat.

#### The main effects of the Cycle:

- A set of high-quality muscle mass
- Increase of muscle relief
- Increase of power indicators
- Fat burning

The main advantage of this Cycle is safety. Basic components are PRIMABOL and OXANDROLON, soft drugs, which practically have no side effects.

#### How to use?

**TEST P – PROPANDROL** – 0,5 amp (50mg) during 7 weeks

**PRIMOBOL** - take every 2-3 days – 2 ml (200mg) during 5,5 weeks (as in the instruction) . Don't forget to warm up the syringe with the drug before use.

**DANABOL 10** – take 4 pills per day, every 4-5 hours a pill, first 30 days.

**OXANDROLON** – take 6 pills per day, (2 pills in the morning, 2 pills at 6:00 p.m, 2 pills at 2:00 a.m) during 20 days, after finishing DANABOL 10.

After course therapy consists of **CLOMED**. Take first and second day 2 pills, then 12 days take 1 pill, then 8 days 0, 5 pill.

#### Training program.

You need to train every other day, 3-4 sessions per week. Standard training time for one session is 45 minutes.

**Diet during the Cycle.**

Its very important to understand that anabolic steroids are good helpers in getting the goal, but they don't work instead of you. The athlete should follow balanced diet, with a bit surplus of carbs and protein for better recovery.
