**SP TROPIN 10 IU SP LABORATORIES** – is released in the form of vials for injection purposes. The SP TROPIN package has **10 vials**. 1 SP TROPIN vial includes 10 IU (3,3 mg). **Somatropin** is a hormone with anabolic activity or in other words, it contributes to muscle growth. It is a natural substance that is produced to stimulate physical growth inside a human body.

**SP TROPIN injections** have a lot of advantages. One of the most important property is the stimulation of a muscle protein synthesis. Actually, Somatropin plays a very important role in muscle building. It counteracts insulin action that prevents fat burning and also promotes muscle anabolism with increasing lean muscle mass. Moreover, this drug takes part during recovery process. This is how muscle mass grows.

Somatropin promotes the use of fat as the energy. This drug significantly increases fat burning and gives the results in a short period of time. Of course, the results will be visible if you follow a diet in combination with regular workouts. Very often, experienced athletes add **HGH** during the AAS cycle. In this case, this medicine shows unexpected results. Due to the lack of side effects, Somatropin is a very popular drug among the athletes. Because of this fact, it can be used not only by men but also by women.
